High Priority

If logged in:

The top priority would be to communicate to the user what was going on in their account at that moment. What books are they currently reading online? Streaming videos? Books that are checked out? Fines? This is all contained in one container/box/area front and center since this is the info that almost anyone I've asked that would go to a library website is actually looking for.

If not logged in:

Prompt users to create an account here. This would not give them a library card but would facilitate and speed up the process of actually getting a library card. All of the info that would normally need to be filled out on paper at the library now can be filled out online. The card can be given and the "official account" can be created once the proper documentation is provided (like mail)

Catalog Search

From here users can search for items either the physical library or the digital library. A drop down next to the form will have options such as "All Categories," "E-Books," "Books," "Movies," etc.

Medium Priority

Navigation

The nav bar will be streamlined to have as few as possible links to keep things simple.

Recent Acquisitions

New books that have been added to the library will be shown in a carousel

Upcoming Events

Featured events will be advertised in a section that displays the event along with the branch/date/time

Low Priority

Profile Page Link

Near the "dashboard" will be a profile link/edit profile sort of link that allows a user to edit their public profile and to view what their public profile looks like. From their settings, they can also disable the public profile to remain a private library customer.

Footer

Provides hours of all branches (all branches have the same hours, in a perfect world) as well as site map, social media links, and top level navigation-

CATALOG SEARCH

2

High Priority

Research / Pleasure Tab

Two different modes for the catalog search:
Power user/research mode or casual/pleasure
reading mode

Search Bar

Seen right away, will have dropdown to
narrow the results if requested to.

Navigation

Medium Priority

Secondary Nav

Popular Books Right Now

Netflix-y scroll through, with hover action to
show details, add to list, etc.

Recommended for You

Self explanatory (like popular books right now)

Low Priority

Profile Page Link

lives at top of site along with a logout link

Footer

Provides hours of all branches (all branches
have the same hours, in a perfect world) as
well as site map, social media links, and top
level navigation-

PROFILE PAGE

3

High Priority

Fines

If the user has any outstanding fines they can be paid for from this module (not public)

Items you have checked out currently

User can choose to enter the page # he/she is on if they want to share their progress with friends – will be displayed as a percentage (you can hide certain titles you'd rather keep hidden)

Favorites

User can choose up to five selections of favorite books, five favorite films, five favorite albums, and five favorite blogs. Categories not filled out will be hidden to the public and will be blank with a plus sign of some sort to the user.

Navigation

Medium Priority

Secondary Nav

Checkout History

A rolling history of every item you've ever checked out. (you can hide certain titles you'd rather keep hidden)

Profile Photo

Follow button

What My Friends are Reading

A feed of what the people you follow are reading

Low Priority

Logout Link

lives at top of site

Footer

Provides hours of all branches (all branches have the same hours, in a perfect world) as well as site map, social media links, and top level navigation-

SEARCH RESULTS

4

High Priority

Specific Result

if the user searched for an author, an author's "catalog page" will show up.. similar to how Netflix shows have pages (especially like Arrested Development) If the whole title of a book was searched for, that book will be large with details, allowing the user to click "click for more info" or to continue scrolling to other results.

Search Bar

Still remains to display search term and to allow an easy/quick way to modify the search

Navigation

Medium Priority

Secondary Nav

Browse the Shelf

A feature that would mimic going to a certain section in the library and browsing based on what's on the shelf

Low Priority

Profile Page Link

lives at top of site along with a logout link

Footer

Provides hours of all branches (all branches have the same hours, in a perfect world) as well as site map, social media links, and top level navigation-

High Priority

Title

Large, simple, alone

Content

Well set type, customizable

Medium Priority

Customize Reading Conditions

Navigation

Bookmark/Note feature

User can drop book marks by highlighting a selection and clicking the icon – bookmarks will live in the margins on the page

Low Priority

Profile Page Link

lives at top of site along with a logout link

Progress Bar

Shows how far the user is into the content

Footer

Provides hours of all branches (all branches have the same hours, in a perfect world) as well as site map, social media links, and top level navigation-

BLOG VIEWER

6

High Priority

Top Blogs

User has an option to feature any blog(s) as top blogs so that they pop up right away when new posts are published.

Navigation

Medium Priority

Secondary Navigation

Categories

Customizeable, user sets up categories by assigning a category to a blog with a tag

Published Today

Shows today's published posts – if none, shows the most recent five posts

Low Priority

Profile Page Link

lives at top of site along with a logout link

Footer

Provides hours of all branches (all branches have the same hours, in a perfect world) as well as site map, social media links, and top level navigation-
